Stainless Steel Triple Grip

G11-06-00-01

Available in left and right profiles, Triple Grip are strong and economical connectors for timber joints

These pre-punched and formed stainless steel steel timber connectors are:

The economical way of achieving a strong, rigid structure.

Quick and easy to install.

Available in two profiles - Left Hand (LH) and Right Hand (RH).

More effective than skew or end nailing; and

Have the necessary strength to ensure transfer of load forces across the joint.

TYPICAL APPLICATIONS

Triple Grips are typically used for the following applications:

G11-06-00-03

Connecting of Rafters to Wall Plate

G11-06-00-04

Connecting of Roof Trusses to Wall Plate

G11-06-00-05

Jack flyovers to truncated truss

TIE DOWN CAPACITY

Joint Group	Tie down capacity (kN) per triple grip Dead Load + Wind Load
J2	4.3
J3	3.1
J4	2.2
JD2	5.5
JD3	4.3
JD4	3.1
JD5	2.5

NOTE: The capacities are derived from AS1720-2010 and are for uplift in houses where failure is unlikely to affect an area greater than 25m2. For primary elements in structures other than houses or elements in a house for which failure would be greater than 25m2 these capacities must be multiplied by 0.94. For primary joints in essential services or post disaster buildings multiply by 0.88. For 2/Triple Grips the table values can be doubled.

FIXING

A minimum of 10/30mm x 2.8Ø Multinail stainless steel nails must be used to fix each Triple Grip for full tabulated values.

4 x Multinail Stainless Steel Nails to truss

2 x Multinail Stainless Steel Nails to top of wall plate

4 x Multinail Stainless Steel Nails to side of wall plate
